3. Roll Call/Establishment of a Quorum.
Present: Bartels, Mountain, Engstrom, Stickell, Hoyt, Rigg.
Absent: Argo.
Staff present at meeting: Penny Mullen-Administrator/Finance Director,
Clint Whitney-Police Chief, and Deanra Hulliger-Village Clerk.
4. Pledge of Allegiance.
5. Reading and Approval of Minutes.
Trustee Rigg motioned to approve the minutes for the Regular Board Meeting held February 1, 2023. A second was given by Trustee Mountain. Ayes: 5, motion carried.
6. Public Presentation/ Recognition and/or Public Comments. None this evening.
7. Reports from the President and Other Officers (on matters not otherwise appearing on the agenda).
 - A. President. Mayor Bartels reported that the water representative from the Buysse water association would like to have a meeting and the Mayor will meet with him the weekend of February 25th/26th. The Buysse Association is needing to build a new tower for their private well. There are about 50-60 homes in Buysse Addition and then there are approximately 16 or 17 homes in Deer Hollow that are having issues with their private well also. Discussion was held.

Trustee Mountain asked about the Crestview Forestview Water project. Mayor Bartels and Ms. Mullen responded that we are waiting on one more easement agreement to be completed by a Crestview resident then we can keep moving forward.

Mayor Bartels informed the Board the Reiling house on Route #6 has been taken down and also the dead tree by ABC Supply has been removed.

The Mayor distributed a layout of the design the Board had requested the Police Department to provide for their area of the Village Hall and the concept of a build out area as well. We will email Kevin and Jake a copy. Discussion was held. The Mayor would like to have a special meeting an hour prior to one of our regular meetings to discuss this

plan further. It would be best to have the new Board members included in this meeting. The second meeting in May is a tentative date for the special meeting.

Trustees-Trustee Rigg would like to thank Ms. Mullen for her quick actions on a resident complaint on E 21st Avenue, it was answered the next day. Ms. Mullen responded that the holes in that area will be filled when the weather gets a bit better.

- B. Police, Public Works & Administration-Chief Whitney has included in tonight's packet the reading from the radar box downloads for review. Trustee Mountain asked if this helps the department on what areas to focus on for radar checks. The Chief responded that this last set of reports was just for a few days, we are going to run these monthly in the future and with additional reviews and studies we will be able to target certain areas. Trustee Mountain wonders if these units will be moved around in the Village. Chief Whitney will get together with Ryan when the weather is better to set up additional locations to move these radar units to. The Chief also mentioned that the police department stats are also included in the agenda packet this evening. We will have better stats once the RMS system gets running smoothly.

Administrator Mullen reported on the following:

At the last meeting the poor condition of the house at 2002 1st Street was discussed. Ms. Mullen sent the home owner a letter describing the violations and they have until February 28th to correct the violations. Ms. Mullen received a call from the owner, who is currently in Arizona, and he requested an extension on this as he will not be back in town until the 1st of May. Ms. Mullen informed the owner she would ask the Board and get back with him on Thursday with the Board's decision. Discussion was held and the owner will be given until the end of May 2023 to correct the violations.

Ms. Mullen contacted IDOT regarding the traffic lights at Route#150/W 3rd Street as requested by the Board last month. IDOT investigated and found no issues. They would like us to let them know if the problem re-occurs.

Ms. Mullen attended a zoom meeting today with IDOT and Klingner and Assoc. on the 1st Street re-surfacing grant and sidewalk issue. Everyone has been given a memorandum from Mark Lee at Klingner with a summary from the meeting. Another zoom meeting is scheduled for Noon on February 22, 2023. Discussion was held.

There are some lights inside and outside at Village Hall that need repaired and also the server room needs a few outlets placed in there. Lakewood Electric has been contacted to perform the work.

Ms. Mullen would like Board permission to place an ad for a part-time building inspector/property maintenance position (no public works in job description). The Board is fine with placing the ad.

The Board was informed that the Annual Audit will start the week of April 3, 2023.

Trustee Rigg asked about the status of the new furniture. Ms. Mullen reported it has been shipped to their warehouse in Davenport and the soonest we can get the carpet cleaned is Saturday, March 4th so delivery will be scheduled for some time after that date.

8. Unfinished Business

- A. Review the ABS proposal for a new server and server battery backup with ABS representative Mitch Bergeson.

Mayor Bartels thanked Mitch for being here this evening. Mitch discussed the various software and systems the Village/Police have in place and how secure it all is through ABS and the backup for the entire system is set up well too. Mitch Bergeson and Trustee Mountain discussed at length the server system and procedures and the Cloud system and procedures. There were no questions from the other Board members.

Trustee Mountain motioned to approve a new server and server battery backup with Advanced Business Systems. A second to the motion was given by Trustee Engstrom. Roll Call: Ayes-Mountain, Engstrom, Stickell, Hoyt, Rigg. Ayes 5, motion carried.

9. New Business

- A. Review, consideration and approval of the Treasurer's Report for January 2023.

Trustee Engstrom motioned to approve the Treasurer's Report for January 2023. A second to the motion was given by Trustee Mountain. Roll Call: Ayes- Mountain, Engstrom, Stickell, Hoyt, Rigg. Ayes 5, motion carried.

- B. Approval of the bills presented for payment.

Trustee Mountain asked about the \$1,800.00 Menard Consulting bill. Ms. Mullen explained it is for the GASB Actuarial Report that is required every other year.

A motion was given by Trustee Rigg to approve the bills presented tonight for payment. Trustee Mountain offered a second to the motion. Roll Call-Ayes: Mountain, Engstrom, Stickell, Hoyt, Rigg. Ayes 5, motion carried.

10. Executive Session to discuss Real Estate.

Mayor Bartels stated there is no need for the executive session this evening.

11. Adjournment

A motion was made by Trustee Stickell to adjourn tonight's Board meeting. A second was given by Trustee Hoyt. Ayes 5, motion carried. Meeting adjourned at 6:52 pm.

Respectfully submitted,

Deanna Hulliger
Village Clerk
Village of Coal Valley

Automated License Plate Readers (ALPRs)

423.1 PURPOSE AND SCOPE

Agency Content

The purpose of this policy is to establish guidelines for the use and operation of Automated License Plate Readers (ALPRs). ALPRs are used by the Coal Valley Police Department for official use only to facilitate the apprehension of criminals.

423.2 DEFINITIONS

Agency Content

Alert - A visual and/or auditory notice that is triggered when the ALPR system receives a potential hit on a license plate.

Authorized Reader - A sworn Coal Valley officer or Police Services Representative that receives and reads hits or alerts.

Authorized User - A detective, supervisor, or ALPR System Administrator who enters, modifies, or maintains records within the ALPR system. All Authorized Users shall be employees of the Coal Valley Police Department.

Automated License Plate Reader (ALPR) - Equipment consisting of cameras, computers, and computer software used to automatically recognize and interpret the characters on motor vehicle license plates. Digital images captured by the cameras are converted into data that is processed through the ALPR system (also known as Automated License Plate Recognition).

Hit - A read matched to a license plate that 1) is on the local hot list on the ALPR system that has been added by an Authorized User, or 2) has been previously entered into National Crime Information Center (NCIC) and/or the Law Enforcement Agency Data System (LEADS).

Hot List - The license plate number of, or associated with a stolen vehicle, a wanted subject, missing person, AMBER Alert, Silver Alert and vehicles used or related to a crime.

Query - A request to access data directly from the ALPR system, including digital images and metadata.

Read - The capture of a digital image, license plate, or vehicle with associated metadata (e.g., date, time, GPS coordinates with vehicle image capture).

423.3 ACCOUNTABILITY AND SAFEGUARDS

Agency Content

Access to data will be closely safeguarded and protected by both procedural and technological means. The Coal Valley Police Department will observe the following safeguards regarding access to and use of stored data:

(a) Only authorized users shall query the ALPR system.

Automated License Plate Readers (ALPRs)

(b) All sworn officers may receive hit/alert on their mobile data computers or other similarly equipped device.

(c) Authorized users are permitted to access the ALPR system for legitimate law enforcement purposes only.

(d) Misuse or abuse of the ALPR system, software, associated databases, or data may be subject to sanctions and/disciplinary action potentially up to and including termination of employment. Misuse or abuse includes:

1. To harass or intimidate any person or group
2. To surveil a person or group solely for political or ideological alignment
3. Use for personal reasons
4. Any use that is not consistent with legitimate law enforcement business and this policy

(e) Information obtained from the ALPR system, software, associated databases, and data may not be disseminated to the public except as authorized or required by law.

(f) All ALPR data downloaded to the mobile workstation and server shall be accessible only through a login/password-protected system capable of documenting all access of information by name, date, and time.

(g) ALPR system audits shall be conducted on a regular basis by the ALPR system administrator. At a minimum:

1. Audits shall include system checks to ensure proper alignment and functionality; and
2. Audits shall include a review of access records for indications of misuse.

423.4 ADMINISTRATION OF ALPR DATA

Agency Content

All installation and maintenance of ALPR equipment, as well as ALPR data retention and access, shall be managed by ALPR System Administrator as designated by the Chief of Police.

423.5 ALPR OPERATIONS

Agency Content

The use of an ALPR is restricted to the purposes outlined below.

(a) Authorized Readers shall use the alert functionality of the ALPR system on their mobile data computers during the course of their normal duty.

(b) Any user of the ALPR system is expected to report any known issues to the ALPR System Administrator in a timely fashion

(c) ALPR hits alone do not constitute reasonable suspicion or probable cause for a stop. Prior to taking enforcement action or initiating a traffic stop on an ALPR hit/alert, in all circumstances an officer shall:

Automated License Plate Readers (ALPRs)

- (a) Visually confirm that a motor vehicle's license plate number matches the plate number recognized by the ALPR system, including both the alphanumeric characters of the license plate as well as the state of issuance; and
2. Verify the hit/alert of the license plate through a query of the Illinois Law Enforcement Agencies Data System (LEADS) and/or the National Crime Information Center (NCIC) before
- (d) is associated with the registered owner. As in all cases, probable cause to conduct a search must be ALPR hits alone do not constitute probable cause for a search of either the vehicle or property specific and individualized based on articulable facts.
- (e) When a hit/alert is triggered, the officer following up on the hit shall either accept or reject the hit/alert and document it using the ALPR system software.
- (g) Only supervisors, detectives, and the ALPR System Administrator are authorized to enter information into the ALPR local hot list. All entries into the local hot list shall document justification into the notes field.
- (h) At the beginning of each Patrol shift, a shift supervisor shall ensure that the ALPR system has been updated with the most current hot list available.
- (j) Information related to the crime, investigation, or officer safety information may be entered into a hot list text field. Other pieces of information should not be entered.
- (k) Investigative alerts may be entered into the local hot list by the Criminal Investigations Division with the approval of the division supervisor. Each investigative alert shall contain specific instructions on the expected action (e.g., report presence of vehicle to Criminal Investigations Division, but do not initiate contact, conduct stop to identify occupants of vehicle, place an investigative detention on the occupants of the vehicle and notify Criminal Investigations Division supervisor).

423.6 ALPR DEPLOYMENT

Agency Content

Generally, the department will deploy ALPR technology around, but not within, neighborhoods most frequently affected by concentrations of crime, especially violent crime. This technology shall not be used to intentionally saturate a particular neighborhood. Deployment determinations will be made primarily using reported crime data and not anecdotal information, however there are a multitude of factors to be considered in determining specific deployment locations.

423.7 ALPR DATA COLLECTION, STORAGE AND RETENTION

Agency Content

All data and images gathered by an ALPR are for the official use of the Coal Valley Police Department. Because such data may contain confidential LEADS and NCIC information, it is not open to public review. ALPR information gathered and retained by this department may be used and shared with prosecutors or others only as permitted by law. The ALPR database is not in the possession of the Village of Coal Valley. The Chief of Police shall direct that all ALPR data

Automated License Plate Readers (ALPRs)

collected shall be purged from the ALPR database after 30 days unless it has become, or it is reasonable to believe it will become, evidence in a specific criminal or Department-related civil or administrative action or is subject to a lawful action to produce records. In such circumstances, the applicable data shall be downloaded from the server onto the appropriate media or server and booked into evidence.

All saved data shall be closely safeguarded and protected. All ALPR data shall only be accessible through a login/password-protected system capable of documenting who accessed the information by name, date, time, and justification for the query. Authorized users are permitted to access the data when there is an articulable suspicion that the data relates to an investigation in a specific criminal or Department related civil or administrative action.

423.8 TRAINING

Agency Content

Only persons trained in the use of the ALPR system, including its privacy and civil liberties protections, shall be allowed to be an Authorized Reader and/or Authorized User. Training shall consist of:

- Legal authorities, developments, and issues involving the use of ALPR data and technology
- Current department policy regarding appropriate use of ALPR systems
- Evolution of ALPR and related technologies, including new capabilities and associated risks
- Technical, physical, administrative, and procedural measures to protect the security of ALPR data against unauthorized access or use
- Practical exercises in the use of the current ALPR system

Training shall be updated as technological, legal, and other changes that affect the use of the ALPR system occur. Generally, this training should occur on an annual basis.

What we believe:

the opportunity

- Technology multiplies the force
- Capture and distribute objective evidence to the right user
- Engage community to support and grow

flock safety

How does the tech work?

flock safety

When you get Flock you get:

objective, real-time and investigative leads

- Vehicle Fingerprint™ = license plate plus
- Indiscriminate evidence from fixed locations
- No people, no facial recognition, no traffic enforcement

What is this tech?

- License plate recognition
- Gathers objective evidence and facts about vehicles, not people
- Alerts police of wanted vehicles
- Used to solve crime
- Adheres to all state laws

What ISN'T this tech?

- Not facial recognition
- Not tied to PII
- Not used for traffic enforcement
- Data not stored beyond 30 days → *automatically deletes every 30 days*

How does this technology prevent and eliminate crime?

- Proactive: Real Time Alerts when Stolen or Wanted Vehicles enter your City
- Investigative: As clearance rates increase, crime rates decrease
- Flock cameras act as a deterrent

flock safety

Mitigating risk

Ethics-Driven Innovation

Protecting Privacy

- Footage owned by Agency/City and will never be sold or shared by Flock
- 30 day data retention, then deleted
- Short retention period ensures that all data not associated with a crime is automatically deleted & unrecoverable
- Takes human bias out of crime-solving by detecting objective data, and detecting events that are objectively illegal (ex. Stolen vehicles)

flock safety

- All data is stored securely in the AWS Government Cloud, and end to end AES-256 encryption of all data
- Search reason is required for audit trail
- NOT facial recognition software
- NOT predictive policing
- NO PII is contained in Flock
- NOT used for traffic enforcement
- Not connected to registration data or 3rd party databases (Carfax, DMV)
- Transparency Portal (optional)

flock safety

**It actually solves and prevents
crime**

Missing Man Found

Shorewood PD  Shorewood, IL

- 78-year-old Shorewood man who went missing on Wednesday morning was found safely later that night at a Tinley Park gas station — all thanks to **new technology used by Shorewood police detectives**.
- The Shorewood police force used the **Flock Safety license plate reader camera database** for Chicago's suburban region to discover the man's car was spotted in Posen around **4 p.m.**
- Posen police then put the man's vehicle into their **Flock "hot list" that can be seen by eight nearby police departments**. Arnold said the missing man suffered from early-onset dementia and had both diabetic and cardiac-related health issues. The man and his vehicle were found around **5:15 p.m.**
- Shorewood has six Flock license plate readers spread across the community.

"Thanks to the quick actions of Shorewood officers and detectives, along with the coordinated effort of outside law enforcement agencies and the technology provided by the Flock Safety LPR Cameras, the 'at risk' senior citizen was reunited with his family in just over one hour from the time of the initial report, 30 miles from his home."

-Chief Arnold's news release noted.

Case Study: Quick ROI- First 90 Days

Bloomington PD  Bloomington, IL

- Locate a suspect vehicle in a **Domestic Abduction**, which led finding the victim and the suspect at a local hotel. Suspect arrested
- Locate a suspect vehicle in an **Armed Robbery/Attempted Murder**, which led to the arrest of the suspect. In this case, the LPR system located the suspect vehicle in another jurisdiction two hours away from B/N
- Located the suspect vehicle in a **Business Burglary** on our cameras as well networked cameras in another jurisdiction
- Recovered **four stolen vehicles**
- Locate and arrest a subject in an **Aggravated DUI** complaint
- Locate three wanted subjects (**felony warrants**)
- Used in **three different suicidal subject calls**

And Much More

Case Study: Smash & Grab Robbery

San Bruno PD

San Bruno, CA

- January 2022 - Five suspects attempt a Smash & Grab at a Jewelry store but are chased off by the owner
- **But here's what didn't make the news...**
- Suspect vehicle identified using Flock
- SBPD thought the suspects would try again, potentially more violently
- **Vehicle placed on a custom hotlist**
- SBPD receives a real time alert that the suspects are returning
- **Officers locate the vehicle within seconds preventing another attempt**
